

US PRO 2000 2ND EDITION

Portable Ultrasound

The US Pro 2000® 2nd Edition Portable Ultrasound Therapy Device is a clinical grade therapeutic ultrasound device that helps with effective pain relief. The pulsed sound waves travel deep into the tissue and induce vasodilation, which helps increase blood flow to the affected area and is found to help relieve pain and reduce muscle spasms. It comes uniquely equipped with a soundhead pre-warming feature on an ergonomically designed sound head for increased patient comfort. Once therapy begins, the pre-warming feature turns off to allow for the most effective treatment.

With three output intensities, and three treatment time selections, the US Pro 2000® 2nd Edition can provide a wide range of therapy treatments. The aluminum sound head is watertight for use in underwater therapy (for up to 30 minutes), though only the metal portion is watertight - you can not submerge the entire sound head. This new and improved portable therapeutic ultrasound unit is a great choice for non-invasive pain relief.

FEATURES:

- Produces Both Pulsed and Continuous Ultrasound Therapy
- Precious Alloy Round-Headed Probe Created a Smooth Surface on the Skin
- Head Warming Feature Pre-Heats the Sound Head Up to 95°F for Increased Patient Comfort
- Sound Head (Metal Part Only) Can Withstand Water Immersion for Up to 30 Minutes with Patient in No More Than One Meter Depth of Water
