

Vscan Air™ CL

Curved array and linear array dual-probe

See more. Treat faster.

GE HealthCare

Freedom and flexibility

Vscan Air CL sets a new standard in handheld ultrasound. The wireless dual-probe with curved and linear transducers delivers crystal clear images anytime, anywhere. Designed for the individual, it's always with you — ultra-portable, cordless, customizable and intuitive. Small and lightweight, Vscan Air goes with you to every patient.

Insight right in your pocket

Accelerate diagnoses and treatment decisions with wireless whole-body scanning for when you need fast answers at the point of care. Vscan Air CL connects to the Vscan Air app with both Android™ and iOS™ devices.

Designed around you

Seamlessly integrate Vscan Air into your daily practice. Our ultra-portable innovations are driven by feedback from clinicians to ensure they're easy to use and intuitive to navigate.

2-in-1 power

Vscan Air CL offers a dual probe so you can complete deep and shallow scans with one handheld device without compromising on image quality.

Durability, guaranteed

Waterproof, military standard drop-tested, flight-ready, ambulance capable and backed by a three-year warranty. We also back you with local reliable service, education tools and online resources.

Designed around you. Built for your needs.

Take Vscan Air CL anywhere* with wireless freedom and maximum portability. One device delivers the value of two: the curved array transducer is ideal for abdominal imaging, obstetric assessments and more, and the linear array is ideal for vascular, MSK, lungs and more. Complete both shallow and deep scans with one device without compromising image quality.

Human-focused design helps keep things simple with one-swipe/tap controls, simple user interface and intuitive design.

Flexible wireless experience includes wireless device connectivity and data sharing to your DICOM® Network server or shared folders. Seamlessly send your image queue during the exam or once connected to your network.

Easily share anonymous exam images or loops to other apps, including your social feed, with just a few taps in the Vscan Air app.

Seamlessly monitors electronics and transducer elements to ensure the device is fully operational even after a drop.

Start scanning faster with smart connect pairing, which keeps your probe connected to your display device while charging.

OB measurements and worksheet include capabilities for fetal size measurements, amniotic fluid check, angle of progression and estimated fetal weight.

World-class cyber security includes auto-delete of images after export, to protect patient information and two-point encryption to keep your data secure.

Intuitive measurement tools to get the quick measurements you need at the point of care — wherever that may be.

Streamline your workflow by annotating images right on your display device.

Built for both new and experienced ultrasound users with basic and advanced assessments in mind.

B-mode

Color Doppler

Pulsed Wave Doppler

M-mode

Powerful processing in a pocket-sized device

Knowing can make all the difference for your patients. You shouldn't have to compromise on image quality with handheld ultrasound — and with Vscan Air, you won't.

Crystal clear images are made possible through the power of SignalMax™ — our proprietary, high-intensity signal processing technology.

Experience the confidence that comes with seeing now to treat faster.

Vscan Air CL consists of a dual-headed probe with both curved and linear array transducers.

Fetal profile

Long supraspinatus tendon

Liver/kidney

Get more from your Vscan Air experience

Powerful imaging. Powerful connections. Two subscription options.

Vscan Air + Digital Tools take your handheld ultrasound experience one step further by connecting you to a suite of user-centric digital tools through our optional Vscan Air subscriptions. Improve your workflow with secure collaboration, image, and device management solutions.

The future of bladder scanning has arrived.

Vscan Air CL with **Auto bladder volume** provides rapid and easy urinary bladder volume measurements to help prevent unnecessary catheterizations.

Powered by AI, the algorithm detects the borders of the bladder and automatically acquires the measurement non-invasively. A 2-step protocol guides the users to acquire both the longitudinal and transverse view, automatically places measurement calipers, and calculates the bladder volume.

Implement your urinary retention evaluation and catheterization protocols with Vscan Air, **a different kind of bladder scanner.**

Crystal clear images for visualization of the bladder.

With Vscan Air you get a real-time diagnostic quality ultrasound imaging system.

Ultra-portable for anytime, anywhere¹ ultrasound.

The pocket-sized portability of Vscan Air delivers ultrasound that can easily be carried from unit to unit and to any bedside.

AI that you control.

With Vscan Air you can see the measurement and adjust, so the user can control the AI measurement based upon their own clinical assessment.

Surpassing traditional bladder scanners in versatility.

Vscan Air can support assessments performed by the entire interdisciplinary team — so you get more, all with a single device.

Individual Solutions gives you access to:

MyImageCloud[†]

Provides cloud storage for managing, sharing, and remotely accessing image data and exams from anywhere.

MyRemoteShare^{*}

Easily and securely connect with colleagues and educators in real time with audio, video, and screen share capabilities.

Fleet Solutions gives you access to:

MyDeviceHub

Remotely manage and control your entire fleet of Vscan Air devices.

MyRemoteShare

Easily and securely connect with colleagues and educators in real time with audio, video, and screen share capabilities.

[†] Works with Centricity™ Universal Viewer Zero Footprint and Centricity Enterprise Archive. Data for EU customers will be stored in AWS servers in Frankfurt, Germany.

^{*} MyRemoteShare is not intended for diagnostic use.

¹ The device has been verified for limited use outside of professional healthcare facilities. Use is restricted to environmental properties described in the user manual.

Built by GE HealthCare, inspired by your needs

As a pioneer of innovation in ultrasound, GE HealthCare created the Vscan handheld ultrasound solution, informed by our ongoing collaboration with healthcare organizations and care providers everywhere.

Our easy-to-use, pocket-sized probes are built with the same ultrasound innovation GE HealthCare is known for, enabling a growing set of care providers in more than 100 countries.
